RAFAEL DANIEL FARFÁN

Full Stack Software Engineer | Java · Spring Boot · React.js · Python

Manizales, Colombia | +57 316 585 7738 | rafaeldanielfarfan@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 4 years of experience building and testing scalable web and mobile applications using Java/Spring Boot, Python, Node.js, React.js, and Flutter. Skilled in RESTful API design, microservices, hexagonal architecture, relational and NoSQL databases (PostgreSQL, MySQL, MongoDB), API security (OAuth, JWT), and CI/CD automation (GitHub Actions, Jenkins). Proven track record of reducing delivery time and improving release quality through test automation and AI-assisted engineering workflows (Claude Code). Agile/Scrum practitioner (SMPC certified) who transitioned from a background in Civil Engineering into Software Engineering in 2022, bringing strong analytical and structured problem-solving skills to software delivery.

TECHNICAL SKILLS

Languages: Java · Python · JavaScript · TypeScript · Dart · SQL

Backend Development: Spring Boot · Spring Framework · Node.js · Express · Django · Odoo · Microservices · Hexagonal Architecture · System Design

Frontend Development: React.js · Angular · Flutter · HTML5 · CSS3

Databases: PostgreSQL · MySQL · MongoDB

API & Security: REST API Design · OAuth · JWT · Postman

Cloud & DevOps: AWS (Lambda, S3, EC2) · Docker · Git · GitHub · GitLab · Jenkins · CI/CD · GitHub Actions

Testing & QA: Unit Testing · Integration Testing · JUnit · pytest · Selenium · Playwright · BDD/Cucumber · Test Automation

Methodologies: Agile · Scrum · Kanban · TDD

AI-Assisted Engineering: Claude Code, LLM-based coding assistants for accelerated development and code review

WORK EXPERIENCE

QE Automation Engineer | FLYR Oct 2025 – Present

Global Airline Retail & Revenue Management Technology Platform · Remote

- Increased backend reliability, validated through automated API testing (Postman, JMeter), by designing and executing test suites for Java and Python services under active development.
- Reduced regression risk on every pull request, measured by consistent CI pipeline pass rates, by integrating automated test suites into GitHub Actions pipelines.
- Improved alignment between engineering output and business requirements, tracked through fewer post-release defects, by applying BDD/Gherkin and Spec-Driven Development practices.
- Cut development time for recurring regression test scripts by 80%, as measured by sprint velocity on affected test suites, by leveraging Claude Code and other AI coding assistants in daily QA workflows.

Full Stack Developer (Development Analyst) | Quality Vision Technologies S.A.S Nov 2022 – Oct 2025

Web, Mobile & ERP Development · Scrum/Kanban

- Cut front-end development time by 25%, measured across 3 projects, by designing and building reusable, modular React.js component libraries.
- Delivered cross-platform mobile apps for Android, iOS, and Web, measured by successful production deployment, by building and optimizing Flutter applications with backend integration and data-sync improvements for low- and mid-end devices.
- Reduced accounting and HR processing time by 35%, measured against prior manual workflows, by developing custom Python automation modules on the Odoo ERP platform.
- Cut release cycle time by 30%, measured by sprint-over-sprint delivery speed, by building automated regression and API test suites with Selenium, Playwright, and Postman.

FEATURED PROJECTS

Food Court Microservices Platform — Built a distributed backend of 4 decoupled Java/Spring Boot microservices using Hexagonal Architecture and TDD, integrating MySQL, MongoDB, RabbitMQ, and Twilio. (GitLab)

Brothers Rent a Car (brothersrentacar.online) — Delivered a full-stack car rental booking platform, measured by successful production launch, using React.js, REST APIs, and AWS deployment.

Pontalida (pontalida.com) — Built a community marketplace connecting local businesses in Rubio, Táchira, Venezuela, using React.js, NestJS, and PostgreSQL.

EDUCATION & CERTIFICATIONS

Civil Engineer — Universidad de Carabobo, Venezuela (2007–2012). Full-Stack Bootcamp (Digital School, 2022); Java & Spring Boot Training (Pragma, 2023).

Certifications & Training (2023): Java Programming Fundamentals · Backend Development with Python & Django · Selenium WebDriver (POM) · Angular Fundamentals · Scrum Master Professional (SMPC) · OOP, Design Patterns & Databases · Data & Programming Foundations for AI (CodeAcademy)

LANGUAGES

Spanish — Native | English — B2 (Upper-Intermediate, Professional Working Proficiency)
